

WHY HL7 AUSTRALIA?

Our members include healthcare providers, government stakeholders, payers, pharmaceutical companies, vendors/suppliers, and consulting firms centered around the health IT field.

HL7 Australia membership offers valuable resources and services plus broader participation to influence the technical and policy environment of HL7 standards.

Welcome to HL7 Australia. We are a membership-based not-for-profit public company limited by guarantee that exists to facilitate adoption of e-health in Australia by promoting effective use of standards and products developed by HL7 International and supporting their enhancement to meet local needs.

HL7 IS SUPPORTED BY MORE THAN 1,600 MEMBERS FROM OVER 40 COUNTRIES.

HL7 is an absolute cornerstone in making [interoperability] happen and our partnership is critical to driving the change we're talking about. Our deepening collaboration with HL7 combined with our role as steward will not only help that standards development but will support the broader healthcare community to engage with those changes.

Amanda Cattermole
CEO of Australian Digital Health Agency
