

9 February 2022: Australian & New Zealand experiences of the January 2023 HL7 International FHIR Connectathon and Working Group Meeting (WGM) in Las Vegas, USA

2023 Joint HL7 Australia & HL7 New Zealand webinar

The purpose of this free webinar is for HL7 AU & NZ members and interested individuals to hear from the Australian and New Zealand delegates attending the 15-20 January 2023 HL7 International Connectathon and Working Group Meeting in USA.

We are also delighted that Viet Nguyen, HL7 International Deputy Chief Standards Implementation Officer and Daniel Vreeman, HL7 International Chief Standards Development Officer.

HL7 International holds its working group meetings (WGM) three times per year. The January 2023 meeting was only the second in-person meeting since the height of the global pandemic. The purpose of these WGMs is to provide the opportunity for work groups to meet to work on standards via the more than 40 work groups dedicated to specialised areas such as security, pharmacy, and patient administration. Additionally, these meetings offer updates on international developments and collaborations (with organisations like WHO), great networking and educational opportunities.

Thursday 9 Feb 09.00 AEDT (Melbourne/Sydney)

Thursday 9 Feb 08.00 AEST (Brisbane)

Thursday 9 Feb 11.00 NZDT (Auckland)

Wednesday 8 Feb 17.00 ET

1 – 1.5 hours
